Re: WKCI (AM), Waynesboro, Virginia
Facility Identification Number: 70862
CC Licenses, LLC
Special Temporary Authorization

Dear Mr. Langham:

This is in reference to the request filed November 16, 2009, on behalf of CC Licenses, LLC ("CCL"). CCL requests further extension of the special temporary authority ("STA") granted on April 27, 2007, to operate Station WKCI with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits.¹

In support of the request, CCL states that it has completed its initial repair work but that these efforts were insufficient to restore the system to normal operation. CCL states that damage to the antenna system now appears to be more extensive than originally anticipated.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WKCI is licensed for operation on 970 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WKCI may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must notify the Commission when licensed operation is restored.² CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 18, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
